## Portfolio description

The specialist investment managers selected for this portfolio may invest in money-market instruments and cash. Money-market instruments are liquid financial instruments that basically simulate cash, but often give a higher return. The managers are given specific mandates aimed at providing an investment return above the average of money-market portfolios, while maintaining a high degree of liquidity and capital preservation. They may only be exposed to institutions with an A1 (F1) credit rating or better.

## **Risk Profile**

very low medium very high

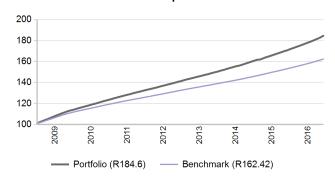

Capital

Probability of a capital loss or negative return in any 12-month period

Inflation
Long-term expected return ahead of inflation

Range
Expected range of returns around the benchmark in any 12-month period

#### Value of R100 invested since inception
