Fund description

Combined - Multi asset class - Absolute and Real Return

Portfolio description

This portfolio is managed within what Investment Solutions regards to be moderate investment parameters. The portfolio aims to provide a gross investment return of 5% a year above inflation-- measured over any three-year rolling period. The secondary objective is to protect capital over any rolling 12 month period. Diversification is achieved by investing in equities, bonds, cash and alternative investments. Over the longer term, returns should be less volatile, but lower than for a typical balanced portfolio because of the investment strategies of the managers, which may include investment in derivative instruments.
